College of Computing and Software Engineering (CCSE)

September Achievements Faculty, Staff and Students. CONGRATULATIONS and WELL DONE!

Please join in congratulating Dr. Lauren Matheny and Dr. Kevin Gittner who received an Innovative Seed Grant of $5000 from the Office of Research. They are developing a fraud detection tool to identify Large Language Model infiltration and fraud in online surveys, working towards a patent.

Congratulations! Kennesaw State Honor College Student Spotlight in September. Meet Kendal Elison, Kennesaw State University- (CCSE) College of Computing and Software Engineering Student. This STEM powerhouse is balancing sports and academics like a pro, with plans to earn a master's degree in the future.

Congratulations to Dr. Austin Brown who is Co-PI with two professors in the Exercise and Sports Management Department. They received a grant from the National Institutes of Health for $428,191.00. The objective of their study is to quantify the relationship between daily step counts and body composition in young, middle aged, and older adults who are overweight/obese and develop a regression model that can be used to prescribe physical activity (daily step counts) for achieving a specific target body weight.

This month CCSE had the pleasure of hosting our bi-annual "Speed Networking" event, and it was nothing short of extraordinary! With a record turnout, this event has once again proven to be tremendously helpful for our students.
A Huge Thank You to the incredible companies who participated, including Immersive Display Solutions, Inc., Driven Software Solutions, Google, EPI-USE, FactSet, The HoneyBaked Ham Co, Assurant, LENET, Macy's Inc., Georgia Tech Research Institute (GTRI), Wellstar Health System, Symphona LLC, Software Engineering Group and Air Force Civilian Services (Robbins AFB), and McKenney's Inc.

Share your success with us! Go to CCSE website and click on Share Your Success tab to submit your information
