

Program Information

College:	College of Computing and Software Engineering
Department:	Computer Science – graduate
Program:	Artificial Intelligence, MS

Program Student Learning Outcomes

Upon completion of this degree from KSU, students will be able to:

1. Apply advanced knowledge of core principles and technologies to solve problems in different areas of artificial intelligence.
2. Create cutting-edge and innovative AI-based solutions for different application domains using coding skills and creative thinking while meeting the standards and requirements.
3. Communicate in writing and oral, and function effectively in interdisciplinary teams as a member or a leader.
4. Analyze and address the ethical and societal implications of artificial intelligence.
